

RIVET
Responsibility in Internationalization of
Vocational Education and Training

RIVET (Responsibility in internationalization of Vocational Education and Training)

The RIVET project goal is to give a step forward into more responsible internationalisation of VET, by engaging more organisations to consider sustainability in their internationalisation strategies.

Therefore, RIVET project specific objectives are:

- Improve Partners' internationalisation strategies by considering sustainability criteria and indicators
- Build Partner's capacity to apply Peer Review method to evaluate international strategy and other activities
- Integrate Peer Review in Partner's Quality Management Systems as a method to evaluate strategies and other activities
- Improve Associated Partners and other European initial VET (iVET) and continuous VET (cVET) organizations' perception of how to integrate sustainability in internationalization strategies
- Improve quality relationships among Partner's peers, teachers and students
- Strengthen international cooperation between partners
- Improve all project partners participants' language, intercultural and team work skills
- Improve all Coordination Team members' project management skills

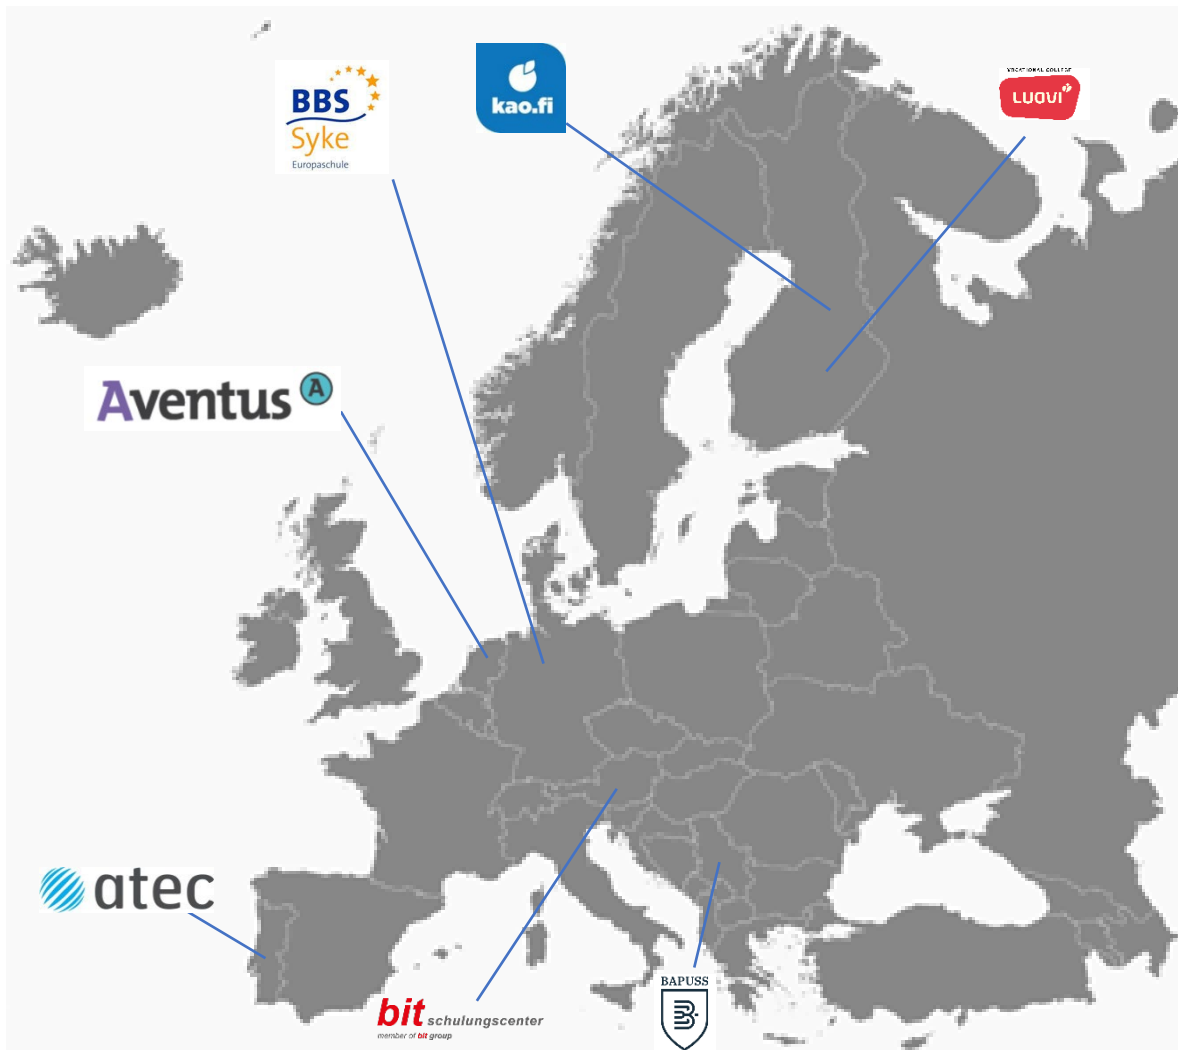

The RIVET project will deliver the following four Project Results:

1. Report about state of the art of internationalisation and responsibility aspect in partner countries
2. Criteria and indicators catalogue
3. Digital self-evaluation tool
4. Learning material for peer review methodology application

The implementation of the project is based on the development of four Project Results, these will directly contribute for the objectives of the project. In order to support the Project Results, the project will carry out four face to face and two online learning, teaching and training activity (LTT), contributing to testing and evaluating results. To reach as much as possible organizations outside of the consortium and contribute to maximize its impact, the project will also implement a dissemination plan, which will include the organization of six multiplier events (three physical and three online), to get the feedback from potential users of the products and to ensure project

sustainability. Raising awareness through wide networks at local, regional, national and at European level are planned to take place.
